Plant SCADA Training Syllabus

COURSE INFORMATION
LENGTH: 4-DAYS

In this hands-on, 4-daycourse, gain insight into PlantSCADA 2018 features and functionalities for your project design and become familiar with integrated engineering interface called Citect Studio. In this course you will learn how to design a project from start to finish and configure various features, including equipment hierarchy. This course includes hands-on practice with core plant operations like visualization, alarming, trending, security, reporting and ISA-95 equipment hierarchies.

Who should attend?

• People who want to become familiar with Plant SCADA project development tecniques
• Citect SCADA users, including engineering staff, maintenance staff and plant Supervisors
• Technical users who maintain and improve their installed Plant SCADA systems
• Managers who want more than a basic understanding of Plant SCADA
• Plant SCADA System Integrators and Designers

Objectives

• Create new projects
• Use Plant SCADA to communicate with an I/O device
• Utilize the benefits of an Equipment Hierarchy
• Create graphic pages and manipulate graphic symbols
• Generate and manage Alarms, Trends and Reports
• Troubleshoot and resolve problems encountered during the course
• Use the Online resources effectively
• Implement and discuss security for the project
• Back-up and restore a project

Prerequisites:

• Experience in PLC control system design and/or programming is desirable
• Familiar with the concepts of industrial automation
• Familiar with Microsoft® Windows Operating Systems
